

MediaWeb Managed WAN Load Balancer

Every organization today recognizes the importance to ensure availability of its Internet/Private WAN connections. In addition to ensuring continuity of WAN connections, businesses need to develop an intelligent WAN strategy to keep their bandwidth cost manageable.

However, few businesses have access to the resources in developing an intelligent WAN strategy. MediaWeb Managed WAN Load Balancer helps you solve this challenge by empowering you to mix-and-match multiple WAN connections (Leased Circuit, DSL, Cable, Wireless etc) achieving unbeatable reliability, availability, manageability and cost.

With MediaWeb Managed WAN Load Balancer, you can achieve fail-proof bandwidth at affordable prices.

⇒ You can increase your overall Bandwidth by load balancing Leased Circuit with other WAN connections e.g. Leased Circuit over a different Telco local loop or DSL.
⇒ You can increase your Bandwidth Availability with Multiple ISP Links (different ISPs, different WAN technologies).
⇒ You can HOST your Public Servers over Multiple ISP Links (Load Balancing or Failover over multiple WAN).
⇒ You can improve your Bandwidth Management with Dynamic Routing and QoS policies. <ul style="list-style-type: none"> ▪ VoIP and Video Streaming traffic can be routed over WAN 1 (e.g. Singtel Leased Circuit). QoS can also be setup to ensure priority and min. bandwidth for this bandwidth. ▪ Lotus Notes and SAP can be routed over WAN 2 (e.g. PacNET Leased Circuit) ▪ Web Surfing and SMTP can be routed over WAN 3 (e.g. StarHub ADSL)
⇒ If any of the WAN fails, the traffic will be automatically failover to other WAN connection(s).
⇒ Best of all, additional WAN connections can be added to the Load Balancer with minimum or no changes on the existing Firewall and Routers.

Service description

MediaWeb Managed WAN Load Balancer uses the industry-leading WAN Load Balancer, AscenVision's AscenLink installed on customer sites by MediaWeb professionals. Not only does this solution provides outstanding WAN reliability to protect against any outage, it provides excellent scalability allowing you to increase bandwidth by mixing lower cost DSL with your existing connection.

As a fully managed service, MediaWeb handles all maintenance, configuration and software upgrades. The service is monitored round-the-clock from MediaWeb's dedicated Network Operations.

Key benefits

MediaWeb Managed WAN Load Balancer provides a highly cost-effective and highly reliable solution to ensure your WAN continuity and manageability.

The key benefits of the service include:

- ▣ **Dependably high levels of WAN reliability**
 As a fully managed service, MediaWeb Managed WAN Load Balancer provides round the clock monitoring and protection against Internet/WAN Outrage. The service is built on industry-leading AscenLink to ensure bandwidth availability. On top of that, MediaWeb Managed WAN Load Balancer provides round-the-clock monitoring of the WAN Load Balancer to ensure that the service is operational.
- ▣ **Simplified WAN Load Balancer Management**
 Rather than deploying your IT administrator to manage the WAN Load Balancer, all changes and maintenance operations are performed by MediaWeb's expert teams. However, you are the decision maker when it comes to WAN Load Balancing/Routing policy, hence ensuring the highest satisfaction in bandwidth utilization. MediaWeb, with our WAN optimization expertise, plays the role of advisor making recommendations to ensure you make the right policies.

- ▣ **More manageable budget**
 MediaWeb Managed WAN Load Balancer is provided as a service for a regular monthly fee, enabling organizations to plan ahead and manage their budget far more effectively. Many costs associated with recruiting, training and retaining expensive and scarce skills can be avoided as MediaWeb's own experts carry out the routine tasks. MediaWeb Managed WAN Load Balancer also helps you to keep your monthly bandwidth expenses low, making the overall WAN budget more manageable.
- ▣ **Escape from capital expenditure cycle**
 Because the WAN Load Balancer is leased from MediaWeb, and all software upgrades or hardware replacement are provided as part of the service, enterprises can minimize their capital expenditure.
- ▣ **Flexible Service Scheme**
 MediaWeb Managed WAN Load Balancer offers both 8 x 5 and 24 x 7 options allowing you to choose the option that suites your requirements. On top of that, you are provided with more than sufficient amount of Support Credit to ensure the highest service level.
- ▣ **Highly scalable platform**
 MediaWeb Managed WAN Load Balancer offers different models of WAN Load Balancer starting with 4Mbps ~ 3 WAN links to 250Mbps ~ 40 WAN links.
- ▣ **14 days money back guarantee**
 MediaWeb Managed WAN Load Balancer takes away all the risk of your purchasing decision with our 14 days money back guarantee. If you are dissatisfied with the service in any way, you can request for a refund within 14 days of your purchase! No questions asked!

Benefits at a glance

- ▣ Dependably high levels of WAN reliability
- ▣ Simplified WAN Load Balancer Management
- ▣ More manageable budget
- ▣ Escape from capital expenditure cycle
- ▣ Flexible Service Scheme
- ▣ Highly scalable platform
- ▣ 14 days money back guarantee

Key features

MediaWeb Managed WAN Load Balancer includes the following key features:

- ▣ **Industry leading AscenVision's AscenLink**
 MediaWeb Managed WAN Load Balancer is built on AscenVision's AscenLink – the leading WAN Load Balancing platform chosen by many leading enterprises.
- ▣ **Round-the-clock monitoring**
 MediaWeb monitors the WAN Load Balancer 24x365, to check that the service is operational, carry out exposure analysis and supervision against any equipment failure.
- ▣ **Reporting on WAN failure**
 Customers are informed regarding the failure of any WAN links failure through email.
- ▣ **Impressive response times built into SLAs**
 MediaWeb's specialist team handles all maintenance and support requests rapidly and effectively, in line with response times defined in stringent Service Level Agreements.

Features at a glance

- ▣ Industry leading AscenVision's AscenLink
- ▣ Round-the-clock monitoring
- ▣ Reporting on WAN failure
- ▣ Impressive response times built into SLAs

Why MediaWeb Managed WAN Load Balancer?

When it comes to WAN availability and manageability, businesses requires an experienced partner. With more than 3.5 years experience in WAN Load Balancing, MediaWeb's knowledge and expertise is second-to-none.

On top of that, AscenLink is an Industry-Leading WAN Load Balancer trusted by many ISPs and Telcos around the world. AscenLink is also deployed by many MNCs to ensure their WAN availability.

In addition to all considerations, MediaWeb Managed WAN Load Balancer provides 14 days money back guarantee to assure your satisfaction with our service.

We're here to help create failproof and cost effective Internet/WAN communications.
